Screen Shots for Excel Manipulation

Overview

- This is a hands on mini class so you can use these data
- If you aren’t good at manipulating Excel, if possible, call in from someone’s desk where you can open the Excel file you down loaded from the web

Objective

- With 10 minutes and these screen shots, you will be able to select just your facility, and be able to identify those outpatient clinics using ICD-9-CM codes that have changed, or have been deleted.
